

PUBLICATION DEADLINES - STATEMENT FROM GENOMICS ENGLAND LTD

As a consequence of the global Log4J vulnerability, Genomics England Ltd closed the Research Environment between Saturday the 11th December and Wednesday the 22nd December.

This was undertaken as a precautionary measure to protect our systems and data from unauthorised access whilst technical fixes were applied. Our Airlock data extraction process was closed down on the same date, and is not expected to be back online until mid-January 2022.

This has meant that researchers have been unable to access our datasets between these dates, and will not have been able to extract data - potentially missing publication deadlines through no fault of their own.

This statement has been provided as support for those requesting deadline extensions.

Please direct any queries to Deborah Lancaster, Service Owner, Genomics England Ltd.
